DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claims 1-3, the preamble recited therein is directed to an on-vehicle navigation system, which provides guidance not with map display but simply with one or more characters and/or one or more symbols. However, there is no recitation in the body of these claims as to how the characters and symbols and not the map display are being employed to provide the guidance. Further, the alternative expression "one or more characters and/or one or more symbols" is considered vague and indefinite. It is suggested to change it to read "at least one character and at least one symbol" in order to rectify the problem. Similarly, the expression "and/or" recited in these claims is also considered vague and indefinite.

Claims 4-7 are rejected for incorporating the above errors from the parent claim by dependency.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 3661

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 2-3 as best understood in view of the aforementioned 112 deficiencies are rejected under 35 U.S.C. 102(e) as being anticipated by Ihara et al (patent no. 6336073).

As per claims 2 and 3, figures 2, 6, 17(b) and 17(c) of the Ihara et al reference clearly disclose a navigation system which provides guidance not with map display but simply with characters and symbols (see figures 17(b), 17 (c) and column 21) including a data storage section (item 103), an input section (item 101), a position section (item 102), a route search section (item 104), a guidance data generating section (item 107) and a guidance and output section (item 108). Further, the guidance section provides the guidance in accordance with either the area information when the vehicle passes by a point of interest (or a predetermined point) or the destination information when the vehicle reaches the destination (see figure 6).

4. The additional reference(s) is/are cited to show the related system(s). Applicant(s) should consider them carefully when responding to the current office action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary Chin whose telephone number is (703) 305-9751. The examiner can normally be reached on Monday-Friday 8:00 AM to 4:30 PM.
